

Press Release

Notification Regarding Exhibit of Japan IT Week Autumn Information Security EXPO [Autumn]
~ At Makuhari Messe from October 23(Wed) to 25 (Fri) ~

DDS Inc. (location of head office: Nagoya-shi Aichi Prefecture President and CEO: Kenji Miyoshino), a company that provides various security solutions starting with fingerprint authentication, will put out an exhibit at the Japan IT Week Autumn Information Security EXPO [Autumn] held at Makuhari Messe on October 23 (Wed) - 25 (Fri).

DDS Inc. will exhibit Authentication Security Platforms compatible with Windows 8 (*1) and Android (*2) terminals, and the thin client of VMWare Horizon View5.2 (*3).

In addition to the external desktop-intended fingerprint authentication devices of the past, external laptop PC-intended fingerprint authentication devices and laptop PCs with built-in fingerprint authentication sensors (products compatible with these sensors are increasing) will be on display.

In order for many people to experience our easy and precise authentication methods which are currently hot and equipped on smart phones, we have set a place in the booth where people can experience the registration and authentication of fingerprints.

(*1) Windows is a registered trademark of Microsoft Corporation.

(*2) Android is a registered trademark of Google, Inc.

(*3)VMWare Horizon View5.2 is a registered trademark of VMware, Inc.

<< Exhibiting Products >>

As products which provide a secure and convenient authentication environment for multiple OSs (*5):

- Fingerprint authentication solution, EVE FA
- Multi-authentication (*6) platform EVE MA

Android related solutions will also be on display.
